

Summary: Colours 'N Motion announces a 'breakthrough' wheelchair: The Spazz G. Designed to be lightweight, stylish and affordable, the Spazz G is the next innovation by Colours.

Announcing the Spazz-G, by Colours Wheelchairs: No Compromise Necessary

(PRweb) January 25, 2005-- Ultra-Light, Ultra-Hip, Ultra-Adjustable, Ultra-Durable, Ultra-Affordable, Ultra-Stylish, Ultra-COLOURS.

Have you been dreaming of that unique custom (Mary: why custom? I thought the Spazz G was NOT customizable) wheelchair that would not cost a fortune? Have Faith. Colours has answered with the SPAZZ-G. Now, not only can you have a totally adjustable stylish wheelchair, but with a suggested retail price of only \$1,450.00 in the USA (approximately EUR 1,300 in Europe), the SPAZZ-G won't break the bank; it has been priced to be covered by most payment plans around the world.

The SPAZZ-G features expandable seat width and depth, as well as positioning adjustable for every unique body. The contoured frame is designed to be not only stylish, but also practical since it is easy to pull into your car over your steering wheel. At 19lbs (8.6 kg), including wheels, it is sleek, lightweight and easy to lift.

The SPAZZ-G has a main rigid axle tube that gives the durability, rigidity and support that you depend on from your wheelchair frame. With the positive locking adjustable backrest, you will benefit from its full range of infinite backrest angle settings. Now you can truly find your perfect sweet spot to set your backrest angle.

But best of all, it is not one of those mass produced, ordinary wheelchairs you see everywhere. The SPAZZ-G is different, because it's a Colours Wheelchair. Celebrate life in a Colours Wheelchair.

About Colours :

Colours is considered a leader in the rehabilitation industry for its design of innovative everyday, sport and pediatric wheelchairs. Colours' wheelchairs are lightweight, adjustable and customizable. At 14.5 pounds (6.6 kg) the custom-designed Zephyr (http://www.colourswheelchair.com/products/prod_zephyr.htm) is one of the lightest wheelchairs on the market.

The Boing! (http://www.colourswheelchair.com/products/prod_boing.htm) is the first wheelchair on the market with four-wheel independent suspension. Colours is disabled owned and operated. For more information: www.ColoursWheelchair.com.

Colours is now expanding in Europe! European distributors interested in distributing Colours Wheelchairs are encouraged to contact Med Services Europe, Colours' European representative.

About Med Services Europe :

Med Services Europe B.V. is based in Amsterdam, The Netherlands and specializes in Sales, Marketing and Business Development services for the Pharmaceutical, Diagnostic and Medical Equipment Industry. Med Services' area of focus is Western and Eastern Europe. For more information www.MedServicesEurope.com
